

KHAING SU LWIN

khaingsulwin.lu@gmail.com | +66 95381 7322 | [LinkedIn: @Khaing Su Lwin](#) | Open to relocation: Bangkok, Thailand

SUMMARY

Researcher with nearly four years of experience specialising in water security, nature-based solutions, and research-policy interfaces across the Mekong region. First-authored a peer-reviewed article in *Nature-Based Solutions* (2025) and an SEI synthesis report. Experienced in qualitative coding and research, systematic evidence mapping, and stakeholder engagement. Currently strengthening technical skills in GIS programming and spatial analysis, alongside qualitative research.

KEY SKILLS

Research & Analysis: Systematic evidence mapping, qualitative coding and analysis (NVivo), literature review, data collection and synthesis, KII design and facilitation

Technical Tools: QGIS, Excel, Datawrapper, Flourish; academic training in SWAT, HEC-RAS, ENVI; Python (familiar); GIS programming (introductory)

Research Communication: Peer-reviewed writing, policy reports, blog writing, podcasting, event facilitation and presentation

Stakeholder Engagement: Multi-stakeholder workshop design and facilitation, community consultation, regional network coordination

Languages: Burmese (native), English (fluent), French (A2–B1)

RESEARCH & PROFESSIONAL EXPERIENCE

Research Consultant | Stockholm Environment Institute (SEI) - Asia | Remote/ Bangkok Nov 2024 – May 2026

- Synthesised strategies and pathways for research-policy interfaces in the water-energy-climate nexus
- Conducted key informant interviews and focus group discussion; managed NVivo qualitative coding
- Published peer-reviewed article as first author in *Nature-Based Solutions* on systematic mapping of nature-based solutions across the Greater Mekong Subregion
- Produced SEI policy report on reducing water insecurities in the Mekong region
- Coordinated multi-reviewers' meetings

Fellow – Research for Policy | Stockholm Environment Institute (SEI) - Asia | Bangkok Nov 2022 – Oct 2024

- Synthesised research outputs from over 30 multi-country projects using NVivo
- Conducted systematic evidence mapping of nature-based solutions across the Mekong region using reference management software, Excel, Flourish, and Datawrapper
- Developed research communications including blogs, reports, and a podcast on science-policy interface
- Co-managed regional young professionals network; conducted youth survey and produced reports
- Supported facilitation of regional research and policy events and assisted small grants administration

Research & Data Analytics Intern | UNCDF (Blue Peace Financing) | Remote / New York Apr – Oct 2022

- Conducted thematic analysis on transboundary water institutions globally
- Developed a living database of transboundary water basins and river basin organisations
- Reviewed Blue Peace Index indicators to assess institutional readiness for financing

Research Intern | International Water Management Institute (IWMI) | Yangon Mar – Aug 2021

- Conducted literature review on water quality and aquaculture water management practices in Myanmar
- Co-designed water quality measurement protocols; developed survey tools and conducted phone interviews with aquaculture farmers
- Analysed data and successfully submitted MSc thesis on water quality and small-scale aquaculture

Research Intern | University of Science & Technology of Hanoi | Hanoi

Jul – Sept 2020

- Supported preparation for field sample collection of riverine sediments
- Analyzed physiochemical properties of river sediments in the laboratory; built a result database in Excel

Project Consultant | The Water Agency | Yangon

Dec 2017 – Aug 2019

- Organized and assisted facilitation of community consultations, multi-stakeholder workshops, capacity building, business meetings and student challenges for water and climate resilience themes
- Synthesized water logistics sector data and supported the management with business meetings
- Assisted in various campaigns to grow Myanmar Water Portal website and organized expo events

Earlier experience (2015–2017): Prior to postgraduate study, held engineering roles in Myanmar — as Operations Engineer at Myanmar Industrial Port (port systems implementation, stakeholder feedback and end-user training) and Site engineer at iGTL Myanmar (supervised construction sites, ensuring safe and timely completion)

EDUCATION**Master of Water, Environment and Oceanography (Dual Degree)**

University of Science and Technology of Hanoi, Vietnam & Université de Poitiers, France | 2019–2021

GPA: 14.87/20 (French grading system)

Bachelor of Engineering: Port and Harbor Engineering

Myanmar Maritime University, Myanmar | 2009–2015

PROFESSIONAL DEVELOPMENT (online training)

- Introduction to GIS Programming, University of Tennessee (2025, ongoing)
- Spatial Analysis, Spatial Thoughts open course (ongoing)
- Introduction to Spatial Analysis, MIT OpenCourseWare
- Methods in Systematic Review and Evidence Mapping, SEI / CEE (2023)

SELECTED ACTIVITIES & ENGAGEMENT

- Panelist – Myanmar Climate Action Week, UN-Habitat (2024)
- Break-out Session Facilitator – Annual Partner Meeting, UNESCAP, Sida, Swedish Embassy (2023)
- Rapporteur – Policy Platform for Climate Change Adaptation and Disaster Risk Management, ADB (2022)
